

# Cardboard Tray Tool

Effective solutions that meet ever  
changing consumer demands

Ishida Europe remain committed to providing our customers with effective solutions that meet ever changing consumer demands.

Current developments are strongly focused towards offering the capability to seal environmentally friendly packaging.

Cardboard MAP trays offer the same extended shelf life as PP-PE or PET packaging though produced from renewable or recycled cardboard.

Cardboard MAP trays can consist of up to 90% recycled cardboard, the plastic inner liner is easily separated allowing both materials to be recycled.

Ishida Europe have developed tooling compatible with the QX-775 Flex and QX-1100 Flex tray sealer ranges to provide a top seal to environmentally friendly cardboard MAP trays, assisting the packaging industry and consumers to reduce consumption and creation of waste plastics.

#### **Features and benefits:**

- ▲ Tooling design to add the capability to seal environmentally friendly packaging to our portfolio for both QX-775 & QX-1100 Flex machines.
- ▲ Assisting packaging industry & consumers in reducing plastic consumption
- ▲ Assisting packaging industry & consumers in reducing plastic waste
- ▲ Recycling – separating plastic films from cardboard for recycling
